

1. Searches for optimum travel routes based on using Total NAVI®

The Total NAVI® search engine makes it possible for users to do comprehensive searches for various kinds of modes of travel such as trains, business, ferries, and even walking, starting from their point of departure up to their destination.

2. Location searches

Users can search for over 4 million locations such as free Wi-Fi hotspots, sightseeing spots, and others.

3. Travel articles

Featured travel guides and articles provide details on, for example, (1) the nearest Wi-Fi hotspots and foreign-currency exchange offices, (2) how to use coin lockers, and (3) information of interest to tourists, starting from Japan's three most scenic spots up to craft-beer establishments. All of these original articles are written by non-Japanese writers who are quite familiar with the kinds of places and things that tourists to Japan want to know about when visiting the country.
